With its aesthetically powerful interior architecture, the Kunsthistorisches Museum Vienna on Maria-Theresien-Platz is a walk-in Gesamtkunstwerk and a unique cultural monument. The richly illustrated and high-quality book tells the story of the building and its interiors as well as showcases the museum's most seminal works from all collections.

Beyond the usual collection boundaries, 86 works of art are presented in pairs – linked by a common idea that can have classical art-historical but also playful associative aspects. A modern declaration of love to the sensual and intellectual opportunities of art.
